

Recognizing and Choosing Food

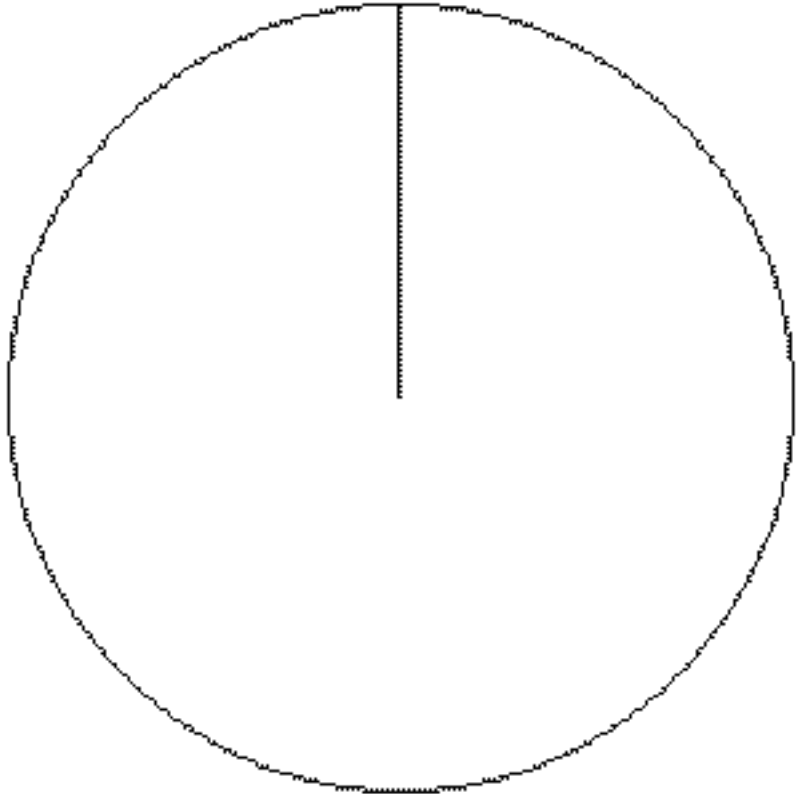

Question 3

Name	<input type="text"/>	School	<input type="text"/>
Class	<input type="text"/>	Date	<input type="text"/>

Buzzard's are birds which regurgitate pellets containing the bones of their prey. A study of the bones in these pellets shows that the buzzard's diet is made up as follows:

rodents	60%
insects	25%
snakes	8%
birds	3%
others	4%

(a) Draw a pie chart to show the diet of the buzzard.
